

## Utility Aid

[Utility Aid](#) (UA) are working with Community Impact Bucks to ensure members of their Community Buildings Service are receiving the best possible rates for their gas and electricity.

UA helps charities by providing services that reduce their energy costs and help them become more energy efficient. Third sector groups can benefit from their wide range of services, including a free remote energy review.

The free review consists of:

- Finding out your current position in regards to your energy contracts, and consumption.
- Check that you are not paying more than you should be and that you are on the correct meter profile for your level of energy usage.
- They will also check that you are not about to roll in to or out of a contract and that you are paying the correct rate of VAT.
- If you are coming up for renewal, they can go to market and come back to you with the most competitive rates we can find and compare them against what you are currently paying, to see if there any savings to be made.

UA also advise on all energy matters, including a bill validation service that checks your bills for anomalies.

For further information about the review, or to start the process of carrying out a review, please contact Louise Mumcular –
